This practical and engaging book provides a coherent approach to global business responsibility and ethics based on the latest research, theory, and practice. The authors incorporate numerous interesting and current real world examples to support the argument that corporations need to - and can - identify and implement processes that foster ethical conduct, ensure basic human rights, protect the natural environment, and enhance social justice wherever businesses operate around the globe. "Global Business Citizenship" combines elements of political theory, stakeholder relationships, business ethics, corporate social performance, accountability and measurement, and organizational change. Its practical approach encompasses "best practices" in stakeholder management, experiments in applying corporate values to local conditions, and social environmental auditing and reporting. Focusing on the strategic alignment and change management process for implementing business citizenship principles and practices, it is an essential supplement for any course concerned with ethics and social responsibility in today's global business climate.

'It was exactly one year ago today,' my father said, 'that the hostages were taken.' He looked at me as if he wanted me to say something. I figured he was probably wrong about it being a year to the day, but I wasn't about to tell him that. 'A year is a long time,' he said. 'A lot can happen in a year.' In the company of classic coming-of-age works, Richard Zuras' debut novel tells the story of a boy's final year of childhood and a family's near disintegration. When Zain's father is fired from the CIA in March of 1980, it creates a tremor that threatens to upend the family's precarious balance. Zain's awakening to a world riddled with cracks and his adolescent attempts to mend them are the stuff from which young men, and great stories, are made.

All aspects of life, namely physical, psychic and spiritual, carry equal significance. In order to preserve balance in the psychic and spiritual spheres, there must first be balance in the physical realm. However, amidst all the rhetoric and gospels of peace, there are many places in the world where even the basic necessities of life are not available. Prabhat Ranjan Sarkar wants us to shoulder this responsibility of addressing this need through the application of PROUT, so that all the people of the world will have greater opportunities and scope for elevation of the mind and spirit. What is Neo-Humanism? When the underlying spirit of humanism is extended to everything, animate and inanimate, in this universe - I have designated this as Neo-Humanism. This Neo-Humanism will elevate humanism to universalism, the cult of love for all created beings of this universe. Explaining humanity and humanism in a new light will give new inspiration and provide a new interpretation for the very concept of human existence. Neo-Humanism will help people understand that human beings, as the most thoughtful and intelligent beings in this created universe, will have to accept the great responsibility of taking care of the entire universe -will have to accept that the responsibility of the entire universe rests with them. Neo-Humanism will make people understand that they are not merely ordinary beings. This philosophy will liberate them from all inferiority feelings and defects and make them aware of their own importance; it will inspire them to build a new world.
